Big D,

I do not want another open house, but do want a construction meeting for our parents, as way to inform them of school operations and safety planning. I sent you the proposed date and time, but do not want to have that meeting turn into a discussion of the design or plan(as that ship has left port), but do want our parents to have the chance to stay informed about the portables, bathrooms, lunch room access, fencing etc.

Best Regards,
Adam Fels
Principal, Louisville Middle School

Yes, it may be important, even though we have made design drawings and information available at several public venues. However I believe that getting our Design Development estimates back and reconciled with the current design should happen before we present the DD visual information. Otherwise we will risk showing something that still may change. I am meeting Thursday December 13th for the DD estimate review with the Architect and Contractor.

It seems like it might be a good idea to host another open house, especially since the plans have changed since the last one. Thoughts?

Susan,
I believe Adam forwarded this to me, another citizen interested in being included or informed.

Subject: Construction Plans for LMS- Neighbors

Are there any planned presentations of the Design/ Construction plans for LMS to inform the neighbors and community?

I am very concerned that the larger Louisville Community, specifically Old Town and the immediate neighbors, have not been included or informed as to the plans for the building.

Thanks,

Peter Stewart
